Executive Summary

The project consortium detected the need for the creation of a shared and collaborative online space to work in a more agile and horizontal way along the project implementation. This platform will serve: a) as a repository to organise the work done in the framework of the project, which is accessible to all members of the consortium and b) as a collaborative working tool.

The deliverable “Setting-up a Collaborative Platform” (D9.1), is part of the WP9 “Project management and coordination”, and has been assigned to Eurecat, the project coordinator.

Microsoft SharePoint has been chosen as the appropriate collaborative online tool considering the needs of the consortium, the functionalities offered by the tool and the availability within the consortium.
